FEATURED PROJECTS

Personal Portfolio Website

January 2025

- Designed and developed a fully responsive portfolio site using HTML5, CSS3, and Bootstrap to showcase my skills and projects.
- Implemented custom CSS animations and optimized for mobile-first design.
- Deployed on GitHub Pages for public access:
https://rathna-webdev.github.io/Portfolio_Rathna/

Responsive Car Website

January 2025

- Conducted user research to understand customer needs for exploring and purchasing cars online.
- Created high-fidelity wireframes and interactive prototypes for desktop, tablet, and mobile views.
- Implemented a clean, modern UI with a focus on visual hierarchy and accessibility.

Custom WordPress Blog

February 2025

- Created a dynamic blog site by customizing a WordPress theme with CSS and Bootstrap components.
- Integrated a contact form and optimized page load speed using best practices.
- Focused on SEO-friendly structure to enhance visibility.

E-Commerce Landing Page Prototype

January 2025

- Built a sleek, responsive landing page using Bootstrap and HTML5 to simulate an online store.
- Added hover effects and a grid layout with CSS for an intuitive user experience.
- Tested cross-browser compatibility on Chrome, Firefox, and Safari.
